

Environmental Policy Statement

7formation Limited will take all such measures as are reasonably practicable to keep abreast of any changes in Statutory Legislation or Regulations and to plan for the implementation of such proposed changes.

7formation Limited will take the necessary measures to identify and, where possible to eliminate and/or minimise any known or potentially harmful effects of its operations and activities on its employees, clients or the general public, and on the environment in general.

7formation Limited will identify any known or potential risk or source of pollution from its operations and activities and will take the necessary measures to eliminate or control any such risk or source of pollution.

7formation Limited will seek to minimise wherever possible the use of finite resources and consumable materials in the course of its activities and reduce all forms of waste to an absolute minimum.

7formation Limited will investigate and implement such measures as are necessary to initiate and continue with an ongoing programme for the recycling of waste materials, where this is reasonably practicable and commercially viable.
